

# Asphalt Zipper<sup>®</sup>

Reduces the cost of trench cutting by up to 70%

Excellent compaction for back-fill material

Re-use

No waste

*Virtually eliminate vibratory pneumatic drills, jack hammers, asphalt saw cutting, chunking and disposal.*

The Asphalt Zipper leaves a scarified edge instead of a smooth edge which actually enhances bonding with new asphalt. University research has shown the interlocking grooves bind over 25% stronger to the new asphalt than the saw-cut edge providing a long-lasting, more waterproof patch that is less prone to slip or settle in the future

**FASTER THAN SAW CUTTING AND BREAKING UP**
